Professional Summary

UX/UI Designer who treats every screen as a system problem, not just a visual one. **I also build in React and HTML/CSS/JS**, which means I design with technical constraints in mind from the first wireframe, not after handoff. Three deployed, end-to-end projects — spanning research, design systems, hi-fi prototyping, and full-stack development — are the proof. Currently completing a B.Sc. (Hons.) in Computer Science at De Montfort University Dubai. Looking for my first UX or design-development hybrid role, entry-level, where I can keep building at this pace inside a real team.

PROJECTS

LearningZone Redesign Project | Full Stack UX/UI Case Study | Jun 2026

([GitHub Link](#)) ([Link to Behance](#))

// React · TypeScript · Node.js · Express · SQLite · Figma · Deployed on Netlify + Render

- Identified usability failures in a real, currently-used university student portal through 6 structured student interviews, mapped findings against Nielsen's 10 Usability Heuristics, then redesigned the platform end-to-end — from lo-fi wireframes through a fully working hi-fi build.
- Built a real backend, not a static prototype: Node.js REST API with JWT authentication and a Prisma/SQLite database, proving the redesign could function as an actual product, not just look like one.
- Result: a deployed, dynamic, full-stack application — frontend on Netlify, backend on Render — that classmates rated significantly more usable and visually clear than the platform currently in use at the university.

FindMyTutor App | UX/UI Case Study | May 2026

([Link to Behance](#))

// Figma · Google Stitch · End-to-end UX process · Clickable hi-fi prototype

- Designed a complete tutor scheduling app from a real, fragmented problem: students struggle to find, vet, and book tutors. Delivered user personas, information architecture, 6 lo-fi wireframes, and a full design system before producing a single hi-fi screen.
- Shipped a 5-screen, fully clickable hi-fi prototype — Home, Tutor Profile, Book a Session, Booking Confirmation, My Bookings — built on a defined component library and consistent design tokens.
- Treated every screen as a trust and conversion problem: profile structured to build credibility before asking for commitment, booking flow grouped by time of day to reduce decision fatigue, confirmation screen designed to drive next-action rather than dead-end the user.

Little Lemon Restaurant Website | React Web App | May 2026

([Link of Website](#)) ([GitHub Link](#))

// React 18 · Context API · React Router · Responsive CSS · Meta Frontend Capstone

- Built and deployed a live, fully functional multi-page restaurant application — menu browsing, table reservations, persistent shopping cart via Context API, and order tracking across 8+ page views.
- Designed the UI with UX principles first, then built it in React — the same design-to-development pipeline that defines how I work on every project, regardless of which half of the brief I'm holding.

EDUCATION

B.Sc. Computer Science (Hons.) | De Montfort University, Dubai

// September 2025 - Present

- Current GPA: 3.8

Diploma In Computer Information Systems | Kwantlen Polytechnic University, Canada

// May 2022 – August 2024

- Member, KPU IT Club · Two-time award winner, KPU International Peer Mentorship Program

CERTIFICATIONS

Google UX Design Certificate | Online

// Completed 2025

- Wireframing, prototyping, user research, usability testing, information architecture

Meta Frontend Development Certificate | Online

// Completed 2026

React 18, JavaScript, HTML/CSS, Version Control, Advanced React, UX/UI Principles, Capstone Project

SKILLS

Design

- Figma (components, auto-layout, prototyping), Wireframing, User Flows, Information Architecture, Design Systems, Visual Hierarchy, Mobile-First Design, Usability Testing

Development

- React 18, Context API, React Router, HTML5, CSS3, JavaScript (ES6+), Node.js, Express, SQLite, Git

Process

- User Research, Persona Development, Iterative Design, Developer Handoff, Cross-Functional Collaboration

Languages

- English (fluent), Hindi (native), Punjabi (native)
